### ABOUT US

Compost, animal and vegetable wastes are digested or grinded as black gold or natural fertilizer. Compost is not a substitute for direct breeding. However, gaining the compost's acquired condition and pH in order to benefit from the gain to be obtained in a large gain gives a lot. By making definite additions to the compost, it is possible to obtain a quality cultivation.

Compost manure is a very effective tool for recycling natural waste and re-enriching the soil. Because, thanks to composting, the wastes that go to waste under normal conditions dissolve in the moist and oxygenated environment of the soil and gain the form of organic fertilizer. Thus, even the most unproductive soils can breathe and revive.

## **1- OBJECTIVE-SCOPS**

The purpose of this standard is to establish minimum requirements and provide recommendations for the use of Compost logo/trademarks in the labeling and promotion of Compost Labelling certified products and Compost Labelling certificate holders to promote Compost Labelling certification.
